Increasing the disk quota on PUPPIS

On PUPPIS, the Pegasus guest user accounts (blue, red, yellow, etc.) each have a disk quota of 200 MB. In some cases an observer may need some more disk space temporarily. In such a case, it is very easy to increase this quota. You need to know the root password to PUPPIS, since only `root` can modify the quota.

- login as root on PUPPIS
- type: `edquota <user>`
- increase the soft and hard blocks (in kB)

Remember to reset the quota to its normal values afterwards or at least to send a note to the *System Administrator* to do it for you.
